

It was a pleasure meeting with you to discuss Jaxon Custom Stainless supplying materials and installation services for stainless steel solid surfaces for upcoming residential kitchen projects.

As we discussed, Jaxon Custom Stainless product line includes kitchen countertops, backsplashes, islands, corbels, tables and table bases, spice shelves and wine racks and many other custom architectural items.

Stainless steel is being used by cutting-edge kitchen designers fueled by consumer interest and offers a contemporary look and feel in a product that costs less than granite.

A copy of our dealer agreement and dealer profile form is attached. The agreement spells out Jaxon Custom Stainless responsibilities in servicing your customers. Please review, sign and return for our records.

Once we receive a signed dealer agreement, tax exemption certificate and dealer profile form, Sandy Jackson will be in touch to schedule an orientation meeting at your retail location. An introductory package including sample kit, sales brochures, information for maintenance and care of stainless steel products along with pricing and ordering information will be reviewed at this introductory meeting.

If at any time you have any questions regarding our products or services, please don't hesitate to contact me for any additional information. We look forward to working with you in providing quality materials and workmanship for sales of Jaxon Custom Stainless products and services.
